work experience

Assoc. Senior UI Designer at Lollypop Design

AUG 2021 - SEP 2024 / BANGALORE, INDIA

- Played a pivotal role in designing and enhancing multiple high-impact projects, such as Vodafone Idea, HDFC and IndiaMART, serving over 10-50 million active users.
- Conducted **research** to inform design decisions, employing techniques such as **stakeholder interviews**, **surveys**, and **competitive analysis**. Designed and validated **user interfaces**, focusing on creating intuitive, efficient, and visually appealing user experiences. Created **prototypes** and conducted **usability testing** to gather feedback and iteratively refine designs. Facilitated effective **communication** and coordination between design and **development teams** to ensure design integrity throughout the development process. Provided detailed design specifications and assets to **support** development and conducted design reviews to ensure quality and consistency.
- Hands-on experience in developing **design systems**.
- Delivered innovative designs and achieved significant market outcomes through individual contributions and multidisciplinary collaboration.
- Demonstrated exceptional written and verbal **communication skills**.
- Recognised with **client appreciations** and awards.

UI/UX Designer at White Rabbit Group

SEP 2019 - AUG 2020 / COCHIN, INDIA

- Initiated, executed, and delivered the **end-to-end design** of multiple professional projects across **B2B and B2C** product domains such as IKONICK, Andes Gifts, and Sodlawn.
- My responsibilities included engaging with stakeholders across teams and clients to identify and prioritize requirements, conducting **research** to inform design decisions, designing and validating **workflows**, **wireframes**, and **user interfaces**, creating **prototypes**, and conducting **usability testing** for iterative refinement. I was also responsible for ensuring effective **communication** between design and development teams to ensure design integrity throughout the **development process**. Provided detailed design specifications and assets to **support** development and conducted design reviews to ensure quality and consistency.

UI/UX Designer at Cubet Techno Labs

JUN 2017 - APR 2019 / COCHIN, INDIA

- Responsible for gathering and understanding requirements, conducting **research** to identify and prioritise **user pain points** and informing design decisions, designing and validating **workflows**, **wireframes**, and **user interfaces**, creating **prototypes**, and conducting **usability testing** for iterative refinement. Additionally, I was responsible for creating **brand elements**, including **logos**, **banners**, and **posters**.

UI/UX Designer at Vyooha Technologies

JUN 2015 - SEP 2016 / COCHIN, INDIA

- Began my career at Vyooha Technologies, where I gathered and understood requirements, conducted **research** to identify and prioritize **user pain points**, informed design decisions, designed and validated **workflows**, **wireframes**, and **user interfaces**, created **prototypes**, and conducted **usability testing** for iterative refinement.
