

Ben Antony

Product Designer

work experience

Senior Product Designer at Neokred

MAR 2025 - APR 2026 / BANGALORE, INDIA

- Driving product design across 5+ fintech products at Neokred.
- Shaping privacy-first, compliant experiences for Blutic platforms (Consent Manager, Cookie Manager), simplifying consent and cookie management (DPDP-aligned).
- Designed Neokred's Payment Gateway for seamless, scalable transaction experiences.
- Driving design contributions across key verticals including Collectbot, Perkle, Profile X, and SoundBox & POS devices.
- Scaling design consistency through design system contributions and seamless design-to-development handoff.
- Applying an AI-driven design approach to enhance workflows, decision-making, and overall product experience.

Assoc. Senior UI Designer at Lollypop Design

AUG 2021 - SEP 2024 / BANGALORE, INDIA

- Played a pivotal role in designing and enhancing multiple high-impact projects, such as Vodafone Idea, HDFC and IndiaMART, serving over 10-50 million active users.
- Conducted **research** to inform design decisions, employing techniques such as **stakeholder interviews**, **surveys**, and **competitive analysis**. Designed and validated **user interfaces**, focusing on creating intuitive, efficient, and visually appealing user experiences. Created **prototypes** and conducted **usability testing** to gather feedback and iteratively refine designs. Facilitated effective **communication** and coordination between design and **development teams** to ensure design integrity throughout the development process. Provided detailed design specifications and assets to **support** development and conducted design reviews to ensure quality and consistency.
- Hands-on experience in developing **design systems**.
- Delivered innovative designs and achieved significant market outcomes through individual contributions and multidisciplinary collaboration.

- Jira
- Notion
- Zeplin
- ChatGPT
- Sketch

- Demonstrated exceptional written and verbal communication skills.
- Recognised with client appreciations and awards.

UI/UX Designer at White Rabbit Group

SEP 2019 - AUG 2020 / COCHIN, INDIA

- Initiated, executed, and delivered the end-to-end design of multiple professional projects across B2B and B2C product domains such as IKONICK, Andes Gifts, and Sodlawn.
- My responsibilities included engaging with stakeholders across teams and clients to identify and prioritize requirements, conducting research to inform design decisions, designing and validating workflows, wireframes, and user interfaces, creating prototypes, and conducting usability testing for iterative refinement. I was also responsible for ensuring effective communication between design and development teams to ensure design integrity throughout the development process. Provided detailed design specifications and assets to support development and conducted design reviews to ensure quality and consistency.

UI/UX Designer at Cubet Techno Labs

JUN 2017 - APR 2019 / COCHIN, INDIA

- Responsible for gathering and understanding requirements, conducting research to identify and prioritise user pain points and informing design decisions, designing and validating workflows, wireframes, and user interfaces, creating prototypes, and conducting usability testing for iterative refinement. Additionally, I was responsible for creating brand elements, including logos, banners, and posters.

UI/UX Designer at Vyoocha Technologies

JUN 2015 - SEP 2016 / COCHIN, INDIA

- Began my career at Vyoocha Technologies, where I gathered and understood requirements, conducted research to identify and prioritize user pain points, informed design decisions, designed and validated workflows, wireframes, and user interfaces, created prototypes, and conducted usability testing for iterative refinement.

selected clients
